## EXPLANATIONS OF REGULAR STATISTICAL TABLES.

**General imports.**—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

**Domestic exports.**—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

**Foreign exports.**—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

**Warehoused merchandise.**—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

**Tonnage tables.**—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

**Weights.**—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

**Customs districts.**—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

DISTRICT.	Port of entry.	DISTRICT.	Port of entry.	DISTRICT.	Port of entry.

WITH ITS NONCONTIGUOUS TERRITORIES.

# COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

# INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

## JULY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for July, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and seven months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

### I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section see page 132.]

Receipts of live-stock at seven interior live stock markets, during July, show a slight decline from the preceding month's receipts and are also below similar receipts for the same month in 1907 and 1906. The figures representing the total receipts of all kinds of animals at these markets amounted to 2,874,193 head as against 3,313,065 head and 3,046,479 head for the same months in 1907 and 1906. Only St. Louis, out of the seven cities of Chicago, Kansas City, Omaha, St. Louis, St. Joseph, St. Paul, and Sioux City, shows increased receipts for the month when compared with the like period in 1907 and 1906. Shipments for July are, however, larger when compared with shipments for 1907 and 1906, the total of all kinds amounting to 763,256 for the current month, 655,460 for July 1907, and 730,104 for July, 1906. Chicago, Kansas City, Omaha, and St. Joseph show increased shipments over the same month last year. As compared with July of last year, the receipts of sheep show an increase, while cattle, calves, hogs, and horses and mules show a decline. During the seven months ending with July, the receipts at these seven markets, 23,694,586 head, make a much better showing when compared with 1907 receipts of 23,365,307 head and the 1906 receipts of 23,073,573 head, owing to the heavier receipts in the earlier months of the year. The gain is due largely to the excessive receipts of hogs for the seven months over the preceding year's season; the other classes of animals, cattle, sheep, horses, and mules continuing to show a slight decline compared with the like periods in 1907 and 1906. The aggregate shipments of all kinds of animals for seven months, from fourteen cities, covering practically the entire distributing territory of live stock, were 6,141,131 for the current year, a heavy gain over the seven months of the two preceding years of 4,872,548 and 5,458,785.

Grain receipts at fifteen markets for July show an increase over the preceding month's, as well as over the like month in 1907, though slightly below the heavy receipts of July, 1906. Receipts for the current month of the year are 50,230,548 bushels, compared with 47,976,765 bushels for 1907 and 63,444,247 bushels for 1906. The following cities comprised in the fifteen markets show gains in receipts over July, 1907: Cincinnati, Indianapolis, Kansas City, Little Rock, Louisville, Omaha, Peoria, St. Louis, and Toledo. Of the total receipts, wheat constituted 24,970,289 bushels, compared with 18,223,991 bushels received during July, 1907; corn, 12,285,365 bushels, compared with 16,937,410 bushels in July, 1907; oats 10,888,295 bushels, compared with 10,848,282 bushels in July, 1907; barley, 1,836,049 bushels, compared with 1,626,446 bushels in July, 1907; rye, 250,550 bushels, compared with 340,636 bushels in July, 1907. Receipts of flaxseed, 1,119,995 bushels, are slightly below those of July of last year, 1,426,646 bushels. Flour receipts, 1,728,999 barrels, compare favorably with receipts for a like period in 1907, 1,742,755 barrels, and in 1906, 1,700,523 barrels. At these same markets during eleven months of the crop season beginning with September, 1907, there was a considerable decline when compared with the receipts for the same period of the two preceding years; the figures for the current year, 689,722,643 bushels, compare favorably with 766,357,592 bushels in 1907 and 775,879,875 bushels in 1906; Indianapolis, Little Rock, and Peoria showing gains over the preceding year—all others showing losses.

Stocks of meat at five principal interior markets at the close of July, 278,976,834 pounds, were smaller than at the end of the preceding month and likewise below the July, 1907 and 1906, figures. All of the cities—Chicago, Kansas City, Omaha, St. Joseph, and Milwaukee—show a decline over the figures of the preceding month.

East-bound trunk-line movement of provisions during the five weeks of July, 97,057 tons, which were in excess of the like period in June, fell below the figures for a like period in 1907. Figures for the thirty-one weeks ending with July, of 638,012 tons, are likewise below a like period for 1907 and 1906. Shipments of grain, 11,633,000 bushels for July, are largely in excess of those for 1907 and 1906, of 8,370,000 bushels and 5,175,000 bushels, respectively, and the movements of the same commodity for the thirty-one weeks of the year ending with July show a considerable gain over the like period in 1906 and 1907; the figures are 90,146,000 for the current year as compared with 79,153,000 bushels for 1907 and 74,466,000 bushels for 1906. Flour shipments, 387,600 barrels, are in excess of the shipments for July, 1907, of 362,498 barrels, as well as the shipments for July, 1906, which were 274,953 barrels, and for the period of thirty-one weeks of the year ending with July the 3,594,034 barrels compare favorably with the flour shipments of 3,730,262 barrels for a corresponding period of 1907 and 3,570,322 barrels for a corresponding period of 1906.

In the shipment of packing-house products from Chicago during the month, there was a perceptible gain over July of last year, but the figures, 476,112,563 pounds, were slightly below those of 1906. As compared with the figures of 1907, increases are shown in pickled beef, cured meats, stearin, while the other commodities of fresh beef, canned meat, dressed hogs, hides, lard, pork, and tallow show a decline. Shipments for the first seven months of the year, 1,377,766,735 pounds, were slightly below those of the corresponding figures of 1907 and 1906 of 1,428,750,567 and 1,691,887,602 pounds, respectively; the greatest decline for the seven months' period being shown in canned meats and hides.

## II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 140.]

Traffic on the Great Lakes between domestic ports during July, as measured by the volume of shipments from various ports, totaled 9,861,270 net tons, compared with 11,223,486 net tons and 10,148,653 net tons shipped during July, 1907 and 1906. Shipments since January 1 of the current year, 21,767,724 net tons, show a similar decrease as compared with the seven months for both preceding years.

The principal grain shipments for the month comprised 4,082,727 bushels of wheat, mostly from Duluth, Milwaukee, Superior-West Superior, and Chicago-South Chicago, as against 5,053,643 bushels for July of last year; 3,811,695 bushels of corn, most of which was loaded at Chicago, show a heavy decrease from the July, 1907, figures of 8,791,104 bushels; oats, 387,423 bushels, were in contrast with 2,400,240 bushels shipped during July, 1907. Largely reduced quantities of barley and rye were shipped during the current month when compared with the same month of last year. Shipments of hard and soft coal for July show an increase over the same month of 1907, the total of the former being 763,487 net tons in comparison with 537,620 net tons for July of last year, and the latter 2,615,532 net tons as against 2,509,016 net tons for a like period of 1907. Hard-coal shipments were principally from Buffalo and Erie. These totals do not include the quantities of bunker coal supplied to lake steamers in the domestic trade, 206,609 tons, compared with 265,445 net tons supplied during July, 1907; moreover, 33,757 net tons were loaded on board lake vessels in the foreign trade during the same period. Miscellaneous and lumber shipments each indicate a decline from the shipments of July, 1907, while salt, 79,146 net tons, shows an increase over the July, 1907, figures of 57,763 net tons. The monthly figures of copper shipped show about 40 per cent loss over the same period of 1907.

Vessel departures from the Great Lake ports during the month in the domestic trade aggregated 10,121 vessels of 13,393,562 net tons register, compared with 10,727 vessels of 13,845,356 net tons register reported for July, 1907. Like figures for the season, to the end of July, comprised 30,084 vessels of 34,212,389 net tons register, compared with 35,752 vessels of 45,918,871 net tons register reported for the season ending July, 1907.

Domestic freight traffic through the Detroit River during July aggregated 8,062,055 net tons, compared with 9,607,142 net tons reported for July, 1907. Of the total freight tonnage given, 4,608,401 represented a southbound and 3,453,654 a northbound movement. Iron ore, wheat, corn, oats, flaxseed, and package freight constituted the bulk of the southbound freight, and coal, iron manufactures, and package freight the larger part of the northbound traffic. The season figures to the end of July show a total freight passing through the river amounting to 16,316,450 net tons, of which 8,609,910 net tons represent a southbound and 7,706,540 net tons a northbound movement. The vessel movement in both directions during the month through the river comprised 3,135 vessels of 6,269,563 net tons register, compared with 3,519 vessels of 6,803,007 net tons register reported for July, 1907. The vessel movement for the current season, 7,618 vessels of 13,281,545 net tons register, shows a large decrease as compared with the figures for 1907, 11,029 vessels of 21,705,031 net tons register.

Freight through the canals at Sault Ste. Marie, Michigan, and Ontario, Canada, during July totaled 7,088,149 net tons in comparison with 7,193,236 net tons, the volume of freight which passed through the canals during the preceding year. There is a decrease in the eastbound traffic, principally in grain, the figures for July amounting to 4,822,281 net tons as against 5,257,243 net tons for July, 1907. Eastbound iron ore movement, however, shows a fair comparison with the July, 1907, movement, the figures representing 4,372,892 for July, 1908, and 4,524,031 net tons for July, 1907. The lumber movement during the month, 70,565,000 feet, likewise shows a shrinkage from the 95,908,000 feet reported for July, 1907.

Westbound traffic during the calendar month, aggregating 2,265,868 net tons, is largely in excess of the total westbound traffic of 1,935,993 net tons, for July, 1907, the principal gain being shown in the movement of coal, where 2,107,576 net tons are reported for July, 1908, as against 1,771,309 net tons for a like period in 1907.

The number of vessels passing in either direction during the month which aggregated 2,546, and comprised a registered tonnage of 5,138,368, compares fairly well with the same period of 1907, when 2,793 vessels of 5,296,514 net tons were reported.

## III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section see page 150.]

The principal Atlantic seacoast cities, Boston, New York, Philadelphia, and Baltimore, show aggregate receipts of live stock for the month of July of 831,582 head, as compared with 869,481 head received during a corresponding period in 1907. Of the total receipts at the end of the month at the four ports named, there were 345,723 head of hogs, 61,557 calves, 81,545 head of cattle, and 342,757 sheep. As compared with the July, 1907, receipts, cattle shows a heavy decline, while the decline of hogs and calves is slight. Receipts of sheep for the month show an advance over the figures of July of last year. During the seven months ending July, 1908, receipts of livestock at the cities named, 5,628,452 head, show a heavy gain over like figures for 1907, which were 4,744,285 head, chiefly attributable to the heavy receipts of hogs and sheep. Cattle, including calves, show only a slight advance.

The receipts of flour and grain for July at the four cities named, 13,685,133 bushels, contrasted with 18,862,460 bushels received in July, 1907, but the 1906 figures of 13,943,676 bushels are more nearly a comparison. For the same cities wheat receipts for July, 6,090,811 bushels, were far in excess of like receipts for July, 1907, 4,430,737 bushels, but corn receipts show an abnormal decline from last year's heavy receipts of 7,053,293 bushels. Flour receipts of 916,824 barrels during the month compare favorably with 1,058,611 barrels received for July, 1907. During the seven months ending with July the receipts of flour and grain at these four cities continued, as at the end of the six months' period, to show a decline when compared with 1907 receipts, affected principally by the heavy decline in corn receipts. The export movement of wheat, 18,597,881 bushels, for seven months ending July from the above-named cities is largely in excess of the exports for a like period in 1907 of 15,161,175 bushels. Flour exports, 4,245,997 barrels, for seven months compare favorably with the 4,440,047 barrels exported during the seven months of 1907.

## IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 153.]

Coastwise receipts of southern pine at New York during July, 30,511,921 feet, were in excess of last month's receipts, but show a considerable decline when compared with July, 1907, receipts of 42,859,543 feet; the principal losses were indicated in the receipts from Mobile, Savannah, and Wilmington. The first seven months of the year's receipts, or 170,595,009 feet, are far below the receipts of 252,163,736 feet reported for the same period in 1907.

Of the coastwise arrivals at Boston during July, 555 vessels of 736,347 gross tons were from Southern ports and 320 vessels of 292,142 gross tons were from Eastern ports, making a total of 875 vessels of 1,028,489 gross tons; the latter number compares favorably with 1,006

vessels of 959,159 gross tons for July, 1907. The arrivals of 5,237 vessels during the seven months of the year ending with July, while slightly below the arrivals for a like period of 1907 of 5,507 vessels, shows a gross tonnage of 5,818,487, which is in excess of the 5,723,688 gross tons for a like period of 1907.

In the foreign and coastwise trade at New York during the current month the arrivals were 897, as against 1,050 for July, 1907; the figures for the first seven months of the year were 5,503 vessels, as compared with 6,303 vessels during the same period of 1907; of the latter total 3,614 vessels represent the coastwise trade for 1907 and 2,979 vessels the coastwise trade for the same period in 1908.

Shipping arrivals in the coastwise trade at Philadelphia for July, 1908, 521 vessels, compare favorably with 569 vessels arriving in the month of July, 1907, and for the seven months ending July, 3,230 vessels, are nearly equal to the number of arrivals for a like period of last year.

#### V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 156.]

Receipts of cotton for the season beginning September 1, 1907, at 29 leading interior markets were 4,789,032 bales, a gain over the receipts of last month, but show a marked decline from the 6,925,850 bales reported during the same period of last year. The comparison with the 1906 figures is, however, more favorable, showing for that period 5,213,193 bales. Receipts at United States ports for the eleven months of the season beginning with September 1, 8,342,657 bales, of which 5,256,809 were from Gulf ports and 3,085,848 from Atlantic ports, show a decline from the 9,809,229 bales reported for the same period in 1907, but an advance over the 1906 receipts of 7,803,267 bales. The decline from the 1907 figures is attributable to the smaller receipts at the Gulf ports of New Orleans, Galveston, and Newport News showing the heaviest losses.

Rough rice receipts for the twelve months of the season, 1,190,889 sacks, compare favorably with the number of sacks reported for the corresponding period of 1907, 1,274,097 sacks, and are considerably in advance of the 879,272 sacks reported for the twelve months of 1906. There is a similar but smaller difference in the distribution of rough rice when compared with last year, the figures being 1,208,860 sacks for the current year and 1,267,594 sacks for the year ending July, 1907. Receipts and shipments of clean rice continue to show declines, both the July and the twelve months' figures for 1908 showing smaller totals than a year ago. The total number of pockets received during the year ending July, 1908, was 571,307, compared with 756,355 for 1907 and 740,258 pockets for 1906.

Live-stock receipts at New Orleans for thirty weeks ending July 29 of the current year, 121,541 head, were in advance of the receipts for the like period of 1907, 111,048 head, as well as the receipts of 1906, 110,914 head.

#### VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 160.]

Shipments of redwood lumber from upper California during July, 30,413,316 feet, compare fairly well with the shipments for the like period in 1907 of 35,805,624 feet and also with the shipments for a like period in 1906 of 32,356,967 feet. The shrinkage both for the month and the season, where 118,163,936 feet for 1908 are contrasted with last year's heavy shipments of 260,158,173 feet, affects principally the consignments to San Francisco Bay. Arrivals of lumber at San Francisco points for the month, 114,860,518 feet, were in excess of receipts for any of the preceding months of the current year, though the total for seven months ending with July fell short of the heavy totals for the same period in 1907.

Arrivals of vessels in the coastwise trade at San Francisco for July, 292,176, are in excess of arrivals for a like period in 1907 of 260,072 vessels. Of these totals, 244,509 vessels, in comparison with 236,170 vessels for July, 1907, were from the Pacific coast, while the remaining vessels were distributed in the trade of Alaska, the Hawaiian Islands, and the eastern coast.

Flour and grain shipments at San Francisco for the seven months of the year, when compared with the same period during 1907, were nearly equal, the totals being 8,132,331 bushels and 8,282,749 bushels, respectively. Wheat receipts for the above-mentioned period show a remarkable gain, while the other classes of grain show relatively smaller declines.

Lumber shipments from Portland, Oreg., for July, 19,579,115 feet, were in advance of the preceding month and, with the exception of the heavy shipments of 20,216,087 feet reported for April, were the heaviest of any month of the current year. The quantity shipped during the first seven months of the year, 109,063,730 feet, compares favorably with 110,683,287 feet for the same period in 1907. Wheat shipments from Portland, Oreg., 9,922,233 bushels for the seven months, are more than double the shipments of last year, 4,150,919 bushels.

Coastwise and foreign shipments of grain from Tacoma, Wash., for July, 222,084 bushels, of which 135,648 bushels were coastwise, show heavy gains over the July, 1907, total of 25,528 bushels, all of which was coastwise. For the seven months total grain shipments of 7,151,086 bushels were in contrast with 1,796,460 bushels for the seven months period in 1907.

#### VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section see page 164.]

River traffic in both directions by way of the Davis Island Dam for July, 150,562 tons, shows a heavy loss when compared with the July, 1907, figures of 405,533 tons, but the totals for the seven months season, 2,169,458 tons, nearly equal those for the same period a year ago of 2,170,716 tons. Coal, representing the principal traffic, showed an amount of 1,615,965 tons in comparison with 1,848,940 tons and 1,387,710 tons for the same periods in 1907 and 1906, respectively. The vessel movement in both directions since the beginning of the year, 15,528 in number, is in excess of the movement for the same period of 1907 of 13,463 and for 1906 of 7,317 vessels.

July arrivals by river at Cairo, Ill., at the confluence of the Ohio and Mississippi rivers, number 525 vessels, of 247,373 tons, compared with 525 vessels, of 458,759 tons, reported for July a year ago. For the first seven months of the year, 5,260 vessels, of 3,147,505 tons, compare favorably with 5,238 vessels, of 3,333,054 tons, for the same period in 1907.

Total traffic by way of the Portland Canal and over the Falls at Louisville, Ky., for the seven months ending with July, 1,054,509 tons, makes a very equitable comparison with the like seven months' total of 1,100,533 tons during 1907. The Chesapeake and Delaware Canal shows a tonnage for the first seven months of the year aggregating 301,460 tons, which is in advance of the 296,890 tons reported for the same period in 1907. For a like period the figures of the New York State Canal are 1,113,029 tons, which are slightly below those of a year ago, 1,536,507 tons.

Total upstream traffic during the month on the Monongahela River at Lock No. 1, representing the maximum upstream movement on the river, 107,709 tons, shows a small decline from the totals of the preceding two years of 155,325 tons and 165,274 tons, respectively. The decline is shown principally in the smaller amount of gravel. The upstream movement of bituminous coal, sand, pit posts, and general merchandise shows a perceptible gain over last year's movements.

## VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PIG-IRON PRODUCTION.

[For tables pertaining to this section see page 168.]

Coal and coke traffic over seven eastern coal-carrying roads during July, 1908, 9,961,996 tons, while far in excess of the preceding month's totals, is still nearly 3,000,000 tons short of a like shipment for July, 1907. The increase over last month's total is due, to a large extent, to the heavier shipments of bituminous coal, which shows over 1,000,000 tons in advance of the June figures. Anthracite coal shipments, 375,569 tons for July, 1908, are below the June, 1908, figures, as well as those for July, 1907, when 544,418 tons were reported. The total anthracite coal shipments for the seven months ending with July, 1908, 3,463,126 tons, handled chiefly by the Pennsylvania Railroad Company, are in comparison with 4,303,067 tons reported for the seven months of 1907. Coke shipments for the same period, 8,257,153 tons, are about 50 per cent below those for the same period of a year ago, while bituminous coal, with the large total of 47,991,363 tons, is about 20 per cent below the total for the seven months of 1907.

Anthracite coal shipments from the eastern producing territory for the month, 4,541,506 gross tons, is below the average monthly shipment and over 1,000,000 gross tons below the shipments in a like month in 1907, though a fair comparison with the July, 1906, shipments. The seven months' figures of shipments, 37,209,948 gross tons, make, however, a better comparison with the same period of 1907, when the total shipments reached the amount of 38,487,030 gross tons, and are in advance of any seven months' totals, with the above exception, since 1903.

The estimated coke production at Connellsville, including the so-called "lower district," during the five weeks ending August 1, 903,516 net tons, was about 1,000,000 tons below the corresponding figures for 1907. The number of idle ovens in this district, reported on August 1, was less than any of the end weeks since February 22; the number of cars used in the shipment of the product for thirty-one weeks ending with July, 194,188, was less than one-half the number required for the same period in 1907.

Pig-iron production during the month, 1,217,897 gross tons, while greatly in excess of last month's production, is still about 1,000,000 tons short of the production for July, 1907. The output for the first seven months of the year ending with July, 7,976,512 gross tons, continues to run, as at the end of six months, about 50 per cent below the output for the seven months of 1907.

Runs of petroleum from wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields for the current month aggregated 8,198,983 barrels, which quantity was nearly 200,000 barrels in excess of last month's runs. To consumers the regular deliveries reported were 8,481,529 barrels, which amount was in excess of the preceding month's deliveries of 8,183,738 barrels. Gross stocks of reporting lines, with the aggregate sum of 72,539,366 barrels, also exceed the aggregate quantity of 70,801,512 barrels reported at the end of June, 1907.

## IX.—CHANGES IN OCEAN FREIGHT RATES.

[For tables pertaining to this section see page 172.]

Ocean freight rates on grain from New York and Boston to European ports continue to show a slight advance over the quotations on the same commodities for a year ago; when compared with the quotations for June the decline becomes imperceptible and, in a few cases, as from New York to Liverpool, Hull, Hamburg, and Rotterdam, of an advance from  $\frac{1}{4}$ d. to  $\frac{1}{2}$ d. Rates on flour from New York to Liverpool and Manchester show higher quotations than for July, 1907. The rates on tobacco in hogsheads from Baltimore to the principal British ports rule about the same as a year ago, with the exception of a slight reduction in the quotations to Liverpool when compared with July, 1907. From New Orleans to the European ports the quotations on compressed cotton and on tobacco continue about the same as the June quotations, and compare favorably with the July quotations of 1907.

## COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-six different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given nevertheless as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

<sup>a</sup> Formerly Butte Terminal.<sup>b</sup> Formerly Terminal (Minneapolis).

Reports from 36 car-service associations, covering practically the entire territory of the United States, indicate the total number of cars handled during July, 1908, 2,272,169, compared with 2,439,037 and 2,741,140 cars handled during July, 1907 and 1906. More than two-thirds of the reporting associations show an increase in the number of cars reported for July over those reported for the preceding month. The American Railway Association reported no marked improvement in the freight-car situation of the country during July, considering that month as a normally light month.

### I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for July and seven months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

#### WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for July and seven months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

#### COMMERCIAL MOVEMENTS OF LIVE STOCK AT INTERIOR MARKETS DURING JULY AND SEVEN MONTHS ENDING JULY, 1906-1908.

## GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

## II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of July, and seven months ending with July. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of July transactions at 153 ports of receipt and 212 ports of shipment were reported. The number of vessels arriving in July was 10,114 and the clearances numbered 10,121 vessels. The registered tonnage for the month was as follows: Arrivals, 13,361,480 net tons; clearances, 13,393,562 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

## SUMMARY OF DOMESTIC LAKE TRAFFIC, JULY AND SEVEN MONTHS ENDING JULY, 1906-1908.

A summary of the lake traffic for July compared with the corresponding months in 1906 and 1907 is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. July receipts in 1908 at all ports reporting were 9,615,491 net tons, compared with 11,041,777 net tons in July, 1907, and 10,424,912 net tons in July, 1906. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

Shipments of boots and shoes from Boston, as reported by the Shoe and Leather Reporter, of Boston, Mass., for the five weeks ending August 1, 1908, amounted to 314,044 cases, against 456,942 cases in 1907. For the thirty-one weeks ending August 1, 1908, the shipments amounted to 1,964,596 cases, against 2,926,282 cases for the same period in 1907.

Fresh fish to the amount of 9,851,185 pounds were received at Boston during July, 1908, as compared with 8,728,121 pounds in July, 1907. At Gloucester the 1908 arrivals of fresh fish amounted to 5,677,854 pounds, and of salted fish 4,284,330 pounds. For July, 1907, corresponding totals were 9,948,786 pounds of fresh fish and 5,460,076 pounds of salted fish. The principal kinds received were cod, cusk, haddock, hake, pollock, halibut, and mackerel.

## GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour, reduced to bushels, at six seaboard markets, during July and seven months ending July, 1906, 1907, and 1908. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

a Revised figures for 1906 and 1907.

## IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas-producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

## COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During July vessels were supplied with fuel at these five ports to the amount of 314,491 tons.

During July 94 collectors of customs report 593,596 gross tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 139,073 tons were placed on board vessels destined to domestic ports and 454,522 tons on foreign-bound vessels. The total value of this tonnage was reported as being \$1,988,566, an average of about \$3.35 per ton.

Moreover 30,140 gross tons of bunker coal were placed on lake vessels in the foreign trade during the month of July, 1908.

## V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton-trade reports include the statement of the quantity of the crop brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

## SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma, and the shipments of citrus fruit from southern California.

## VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

## VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the seven months ending July 31, 1908, of the vessels reported, 1,356 were loaded with coal; 462 carried lumber, logs, piling, and wood; 70 carried ties; 318 carried merchandise; 5, rocks; 14, corn; 34, manufactured iron; 6, molasses; 3, sugar; 10, brick; 1, staves, and 7, wire and nails.

## TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 15,384 tons mined in the first and second pools during July, makes a total coal traffic of 717,664 tons for the river during July. Of other downstream freight, 13,808 tons of miscellaneous merchandise are to be added, making a total of 731,472 tons in July. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For seven months ending July the total movement was 5,969,253 tons in 1908, 6,984,423 tons in 1907, and 6,640,022 tons in 1906. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in July amounted to 107,709 tons.

The total freight moved in both directions on this basis of calculation was 839,181 tons in July, 1908, as against 1,017,842 tons in July, 1907, and 904,315 tons in July, 1906.

## VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

## STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

## X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of July, 1908.

## EXPLANATIONS OF REGULAR STATISTICAL TABLES.

**General imports.**—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

**Domestic exports.**—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

**Foreign exports.**—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

**Warehoused merchandise.**—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

**Tonnage tables.**—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

**Weights.**—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

**Customs districts.**—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE OF PORTO RICO.  
COMMERCE OF THE PHILIPPINE ISLANDS.  
COMMERCE OF GUAM, MIDWAY ISLANDS, AND TUTUILA.

RECAPITULATION OF COMMERCE OF NONCONTIGUOUS TERRITORIES.  
TONNAGE MOVEMENT IN THE TRADE OF THE UNITED STATES  
WITH ITS NONCONTIGUOUS TERRITORIES.

# COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

# INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

## AUGUST SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for August, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and eight months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

### I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section see page 324.]

Live-stock receipts at seven interior primary markets during August show gains over the preceding month's receipts as well as over receipts of August, 1907, and are nearly equal to the August, 1906, receipts. The total receipts of all kinds of animals at these markets for the current month amounted to 3,232,441 head, in comparison with 3,130,225 head, and 3,295,425 head for August, 1907 and 1906. Only St. Louis and Sioux City showed a decline in receipts for the month's total when compared with August, 1907. As compared with the same month of last year, cattle, including calves, and sheep show increases, while hogs, horses, and mules show a slight decline. For the eight months ending with August receipts at these seven markets, 26,927,027 head, compare favorably with receipts of a like period in 1907, 26,495,532 head, and receipts for 1906 of 26,368,988 head. The gain is due to the heavy receipts of hogs for this period; other classes of animals show a decline when compared with the eight months' period in 1907 and 1906. Aggregate shipments for the eight months ending with August at these same markets, 7,018,416 head, are in advance of the two next preceding years' shipments of 5,843,936 head and 6,378,689 head, respectively. Each of the seven cities constituting the markets under discussion show larger shipments for the eight months than for same period of 1907 and 1906. The gain is principally due to the heavy shipments of hogs, the other classes of animals nearly equaling those reported for a like period in the preceding two years. The number of cars required to handle these shipments during the eight months was 140,138, an increase over the preceding two years' figures of 139,301 and 137,106, respectively.

Receipts of grain at fifteen leading markets for August show heavy gains over the preceding month's figures and compare favorably with the receipts for August, 1907 and 1906. For the current month the receipts of all kinds of grain are 70,445,551 bushels, as compared with 72,537,039 bushels in August, 1907, and 71,384,865 bushels in August, 1906. The following cities comprising the fifteen markets in question show gains in receipts over a like month in 1907: Cincinnati, Detroit, Indianapolis, Milwaukee, and Minneapolis, the latter alone showing a gain of over 2 million bushels, the other cities except those named showing small declines. Of the total receipts, wheat constituted 29,062,350 bushels, as compared with 31,247,541 bushels in 1907; corn 14,783,812 bushels, as compared with 16,665,460 bushels in 1907; oats 20,731,555 bushels, as compared with 21,823,676 bushels in 1907; barley 4,979,445 bushels, as against 2,182,868 bushels in 1907; rye 888,389 bushels, as compared with 617,494 bushels in 1907. Receipts of flaxseed, 395,205 bushels, are slightly below the figures for the same period in 1907 of 589,995 bushels, while flour shows a considerable gain over the same month in last year—the figures being 2,017,567 barrels, as against 1,805,242 barrels in 1907. At these same markets during the twelve months of the season beginning with September 1 and ending with August 31, there was a perceptible decline when compared with receipts for the same period in the two preceding years; the figures for the current year are 760,168,194 bushels, as against 838,894,631 bushels in 1907 and 847,264,740 bushels in 1906. Cincinnati, Indianapolis, Little Rock, and Peoria all show considerable gains, while the other cities comprising these markets show a decline. The decrease is about equally divided among wheat, corn, and rye, while barley shows a considerable advance when compared with the figures for twelve months in 1907.

Stocks of meats at five principal interior markets at the close of August, 228,195,007 pounds, are below the preceding month's totals of 278,976,834 pounds, as well as the other five months of the calendar year. All the cities—Chicago, Kansas City, Omaha, St. Joseph, and Milwaukee—show declines.

During the four weeks of August the east-bound trunk-line movements of provisions at Chicago and Chicago junction points, 76,467 tons, were below those of any similar period of the current year and also show declines for a like period in 1907 and 1906. For the thirty-five weeks ending with August the decline is inconsiderable when compared with the same period in 1907; the figures reported are 724,479 tons, as against 787,123 tons for 1907. Shipments of grain for the month, 8,845,000 bushels, while below the figures for July, show considerable advance over the August, 1907, figures of 6,143,000 bushels, and are far in advance of the August figures of the two next preceding years. A like improvement is also shown for the shipments of wheat during the thirty-five weeks ending with August; 98,991,000 bushels are reported, as against 85,396,000 bushels for a like period in 1907 and 79,463,000 bushels for 1906. Shipments of flour for the four weeks ending with August, 350,327 barrels, while slightly below last month's shipments are greatly in excess of August, 1907, figures of 323,536 barrels, and of the figures of August, 1906, 256,194 barrels, but the ratio of gain does not hold when compared with the thirty-five weeks' season ending with August, when 3,944,361 barrels are reported, in comparison with 4,053,798 barrels in 1907 and 3,896,405 barrels in 1906.

Shipments of packing-house products from Chicago during the month, 184,319,378 pounds, are but slightly below the figures for July, though there is a considerable falling off when compared with the figures for August, 1907, of 202,266,960 pounds, and of August, 1906, of 218,619,596 pounds. The most notable declines are shown in tallow, lard, canned and cured meats, and pickled beef, while dressed beef and hides show gains over the August figures for 1907. Shipments for the first eight months of the year, 1,562,086,113 pounds, are below the shipments for the same period in 1907 of 1,631,017,527 pounds, and show a considerable decline when compared with the same period in 1906 of 1,910,507,198 pounds; the principal declines are noted in dressed hogs, tallow, stearin, and pickled beef. Fresh beef, canned meats, and hides show considerable advance over a like period in 1907.

## II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 333.]

Traffic on the Great Lakes between domestic ports during August, as measured by the volume of shipments from various ports, totaled 10,065,449 net tons, compared with 12,125,458 net tons and 10,922,732 net tons shipped during August, 1907 and 1906. Shipments since January 1 of the current year, 31,833,173 net tons, show a similar decrease as compared with the eight months for both preceding years.

The principal grain shipments for the month comprised 4,073,400 bushels of wheat, mostly from Duluth, Milwaukee, Superior-West Superior, and Chicago-South Chicago, as against 4,581,482 bushels for August of last year; 3,538,355 bushels of corn, most of which was loaded at Chicago, show a decrease from the August, 1907, figures of 3,894,004 bushels; oats, 572,119 bushels, were in contrast with 1,157,074 bushels shipped during August, 1907. Largely reduced quantities of barley and rye were shipped during the current month when compared with the same month of last year. Shipments of hard and soft coal for August show an increase over the same month of 1907, the total of the former being 562,120 net tons, in comparison with 555,828 net tons for August of last year, and the latter 2,321,593 net tons, as against 2,054,823 net tons for a like period of 1907. Hard coal shipments were principally from Buffalo and Erie. These totals do not include the quantities of bunker coal supplied to lake steamers in the domestic trade, 221,257 tons, compared with 295,876 net tons supplied during August, 1907. Moreover, 38,181 net tons were loaded on board lake vessels in the foreign trade during the same period. Miscellaneous and lumber shipments each indicate a decline from the shipments of August, 1907, while salt, 71,421 net tons, shows an increase over the August, 1907, figures of 58,424 net tons. The monthly figures of copper shipped show about 48 per cent gain over the same period of 1907.

Vessel departures from the Great Lake ports during the month in the domestic trade aggregated 10,453 vessels, of 13,543,975 net tons register, compared with 11,314 vessels, of 15,020,890 net tons register, reported for August, 1907. Like figures for the season, to the end of August, comprised 40,537 vessels, of 47,756,364 net tons register, compared with 47,066 vessels, of 60,939,761 net tons register, reported for the season ending August, 1907.

Domestic freight traffic through the Detroit River during August aggregated 7,962,596 net tons, compared with 10,583,578 net tons reported for August, 1907. Of the total freight tonnage given, 4,998,417 represented a southbound and 2,964,179 a northbound movement. Iron ore, wheat, corn, oats, flaxseed, and package freight constituted the bulk of the southbound freight, and coal, iron manufactures, and package freight the larger part of the northbound traffic. The season figures to the end of August show a total freight passing through the river amounting to 24,279,046 net tons, of which 13,608,327 net tons represent a southbound and 10,670,719 net tons a northbound movement. The vessel movement in both directions during the month through the river comprised 2,977 vessels, of 6,856,471 net tons register, compared with 3,710 vessels, of 7,584,531 net tons register, reported for August, 1907. The vessel movement for the current season, 10,595 vessels, of 20,138,016 net tons register, shows a large decrease as compared with the figures for 1907, 14,739 vessels, of 29,289,562 net tons register.

Freight through the canals at Sault Ste. Marie, Mich., and Ontario, Canada, during August totaled 7,181,430 net tons, in comparison with 8,544,833 net tons, the volume of freight which passed through the canals during the preceding year. There is a decrease in the eastbound traffic, principally in grain, the figures for August amounting to 5,196,760 net tons, as against 10,436,045 net tons for August, 1907. Eastbound iron-ore movement also shows a heavy decrease in comparison with the August, 1907, movement, the figures representing 4,661,552 net tons for August, 1908, and 6,120,880 net tons for August, 1907. The lumber movement during the month, 79,047,000 feet, likewise shows a shrinkage from the 99,889,000 feet reported for August, 1907.

Westbound traffic during the calendar month, aggregating 2,162,711 net tons, is largely in excess of the total westbound traffic of 1,847,526 net tons for August, 1907, the principal gain being shown in the movement of coal, where 2,027,425 net tons are reported for August, 1908, as against 1,653,056 net tons for a like period in 1907.

The number of vessels passing in either direction during the month, which aggregated 2,492, and comprised a registered tonnage of 5,286,069, shows a decrease when compared with the same period of 1907, when 3,013 vessels of 6,352,462 net tons were reported.

## III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section see page 343.]

The four principal Atlantic seacoast cities, Boston, New York, Philadelphia, and Baltimore, show aggregate receipts of live stock for the month of August of 747,170 head, a slight gain over the August, 1907, figures of 728,812 head. Of the total receipts at the end of the month at these four ports there were 280,442 hogs, 46,592 calves, 88,212 cattle, and 331,924 sheep reported. As compared with the August, 1907, receipts, cattle show a decline, while hogs, calves, and sheep show perceptible gains. For the eight months ending with August, 1908, receipts at these same cities, 6,375,622 head, were far in advance of those received for the same period in 1907 of 5,473,097 head, the most notable gains being shown in the receipts of sheep and hogs, while calves showed a slight gain and cattle a slight decline.

Receipts of flour and grain for August at the four cities named, 17,362,249 bushels, compared favorably with 19,472,604 bushels for 1907 and 20,028,216 bushels for 1906. New York and Baltimore showed gains over the figures for August of last year, while Boston and Philadelphia showed declines. For the same cities wheat receipts for August, 7,486,627 bushels, were below the receipts for August, 1907, of 9,533,786 bushels, but the exports of 6,610,004 bushels were about 53 per cent in advance of the exports of last year. Corn continue to show a remarkable decline when compared with the same period of last year, while flour is nearly on an equal, reporting for the month of the current year 1,106,733 barrels, as against 1,189,802 barrels for a like period of last year. For the eight months ending with August the receipts at these cities were 115,065,657 bushels of grain, including flour reduced to bushels, as against 162,192,254 bushels in 1907 and 154,842,911 bushels for the same period in 1906. Wheat receipts for the same cities and the same period were 29,821,110 bushels, as against 37,993,830 bushels in 1907, and the exports of wheat maintained about the same ratio of gain over the preceding months of the year, showing 25,207,885 bushels for the eight months of the current year, as against 19,474,420 bushels for a like period in 1907; while the exports of flour, 4,762,034 barrels, were less than a half million short of the exports during the eight months of 1907.

## IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 346.]

Coastwise receipts of southern pine at New York for the month of August, 29,704,185 feet, were nearly equal to receipts for last month, but are still below the receipts for August, 1907, of 38,303,192 feet. For a period of eight months the receipts amounted to 200,299,194 feet, as against 290,466,928 feet in 1907; the decline is shown chiefly in the receipts from Fernandina, Fla., Charleston, S. C., Jacksonville, Fla., Mobile, Ala., and Wilmington, N. C., the last-named city having fallen off from 21,723,410 feet in 1907 to 6,884,195 feet in 1908.

Of the 521 vessels arriving at New York for the month of August, 251 were from southern ports and 270 were from eastern ports. These arrivals in both cases, and in the total, show a decline when compared with August, 1907, when 614 vessels were reported, 288 of which were from southern ports and 326 from eastern ports. For the season of eight months the totals are 3,500 vessels as against 4,228 vessels for the eight months of 1907 and 4,757 vessels for a like period in 1906.

Coastwise arrivals of vessels at Boston for the month, 799 vessels of 1,016,466 gross tons, are in contrast with 1,022 vessels for August, 1907, though the gross tonnage of 1,068,449 is nearly equal to that of the current month. For the eight months of the current year there were reported 6,036 vessels of 6,834,953 gross tons, which is a favorable comparison with the 1907 figures for a like period of 6,529 vessels of 6,792,137 gross tons.

Arrivals of American vessels in the coastwise trade at Philadelphia for August, 381, and those in the foreign trade, 105, making a total of 486 vessels, are considerably below the total arrivals for 1907 of 623 vessels, though the figures for eight months, 3,716 vessels, of which 2,813 were in the coastwise trade and 903 in the foreign trade, compare favorably with the same period in 1907 of 3,970 vessels—more than 70 per cent of which were in the coastwise trade.

At Mobile the arrivals of vessels for the month numbered 47 of 45,151 tons registry, as against 58 of 57,721 tons registry in August, 1907. During both years the majority of these arrivals were foreign. For the eight months of the year, 474 vessels of 473,829 tons, compare favorably with 483 vessels of 492,593 tons during the eight months of 1907.

## V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 349.]

The total sight receipts of cotton for the year ending with August 31, 1908, aggregated 11,592,489 bales. This amount, minus 20,523 bales left over at twenty-nine interior towns, leaves a net total of 11,571,966 bales as the commercial crop of the United States for the year just ending, in comparison with 13,510,982 bales, the large crop of 1907, and 11,345,988 bales of 1906. The 1907-8 crop was distributed as follows: Exported, 7,575,230 bales, more than one-third of which went to Great Britain; taken by American spinners, 4,089,938 bales, 2,193,277 bales of which were taken by southern mills and 1,896,661 bales by northern mills; and 181,496 bales designated as stocks at United States ports August 31. The aggregate of these amounts, 11,846,664 bales, less 6,020 bales returned from foreign countries, represents the total available supply, including the 286,678 bales left over from the 1906-7 crop. Receipts at United States ports for the year, 8,579,842 bales, compare fairly well with the 9,919,555 bales received last year and are in advance of the 8,029,544 bales received during the crop year of 1906.

Live stock receipts at New Orleans for the thirty-five weeks ending August, 1908, 138,071 head, were in advance of the 127,155 head for a like period in 1907 and 127,596 head in 1906.

Tobacco receipts at six leading tobacco receiving markets in the South from January 1 to August 31 aggregated 129,478 hogsheds in comparison with 133,652 hogsheds in 1907. Cincinnati and Hopkinsville, Ky., show gains while the other four cities show slight declines over the figures of last year.

At Savannah, Ga., naval stores, both turpentine and rosin, show gains in receipts during the season from April 1 to August 31. The receipts of the former are 143,541 barrels for the season of the current year, as against 109,367 barrels for the same period of last year, while the totals of the latter, 407,247 barrels, are far in advance of the 299,483 barrels in 1907.

## VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 353.]

Arrivals of vessels in the coastwise trade at San Francisco for August show an aggregate tonnage of 272,755, of which 249,641 tons were credited to the Pacific coast and the remainder distributed between Alaska and the Hawaiian Islands. The tonnage for August of last year, 274,386, was divided as follows: Pacific coast, 254,475 tons; Hawaiian Islands, 12,022 tons, and Alaska 7,889 tons. The eight months' total of 2,127,137 tons shows a near approximation to the 2,166,928 tons total of 1907.

There is a perceptible gain in the grain receipts at San Francisco for the month, 1,646,754 bushels, as against 1,210,633 bushels received for August, 1907; and the difference between the receipts for the eight months of the years is inconsequential when compared with a like period in 1907. Wheat, however, shows a gain of about 1,500,000 bushels for the eight months ending with August over a like period of last year, while the receipts of barley have fallen off about 1,000,000 bushels during the same period.

Shipments of redwood lumber from upper California for the month, 33,884,429 feet, are about 3 million feet in advance of last month's shipments and about the same amount below the shipments of August, 1907, when 36,611,427 feet were reported. For the season of eight months the shipments amounted to 215,048,365 feet, as against 296,769,600 feet for a similar period in 1907. The shrinkage both for the month and the season of eight months affects principally the consignments to San Francisco Bay. Arrivals of redwood, pine, and fir lumber at San Francisco for eight months of the current year, 828,883,565 feet, while approximating the arrivals for a like period in 1906 of 892,669,010 feet are far below the heavy arrivals of 1,220,912,027 feet for the eight months of last year.

August shipments of lumber from Portland, Oreg., of 14,903,190 feet, compare fairly well with the shipments for the preceding months of the current year and the total for the first eight months of the year, 123,966,920 feet, of which 40,201,674 feet are domestic shipments and 83,765,246 feet foreign shipments, are not largely exceeded by the total shipments for the like period in 1907 when 128,174,174 feet were reported.

Coastwise shipments of lumber from Seattle, Wash., for the eight months ending with August, 941,348,000 feet, show a phenomenal gain over shipments for a like period in 1907 when only 10,324,000 feet were reported.

The harbor master's monthly report at Seattle for August indicates the arrivals of 543 vessels of 1,000,442 tons registry, as against 590 vessels of 1,008,184 registered tons for the same period in 1907.

## VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section see page 357.]

Traffic in both directions by way of the Davis Island Dam for August, 271,670 tons, the greater part of which was represented by shipments of coal and sand, is below the 1907 and 1906 traffic of 323,033 tons and 322,373 tons, respectively. The season's total of 2,441,128 tons make, however, a better comparison with the total of 2,493,749 tons for the eight months of 1907, and is largely in advance of the 1906 season's figures of 1,879,272 tons registry.

Total traffic by way of the Portland Canal and over the Falls at Louisville, Ky., for the eight months ending with August, 1,073,466 tons, compares favorably with a like period in 1907 of 1,163,585 tons, and is considerably in advance of the 1906 figures of 950,089 tons. The New York State Canal reports for the first eight months of the year 456,926 tons, of which 110,645 tons are westward bound and 346,281 tons eastward bound, in comparison with a total of 407,853 tons for last year, of which 99,721 tons were westward bound and 308,132 tons eastward bound. For the season of eight months there is a fair comparison with last year's totals, the figures being reported as 1,569,955 tons for the current season as against 1,944,330 tons for a like season in 1907.

August arrivals by river at Cairo, Ill., at the confluence of the Ohio and Mississippi rivers, number 590 vessels of 304,294 tons, in comparison with 673 vessels of 381,566 tons for August of last year. The total arrivals for the season ending with August, 1908, 5,850 vessels with a tonnage of 3,451,799, are but slightly below the 1907 season's figures of 5,911 vessels of 3,714,620 tons.

Total upstream traffic during August on the Monongahela River at Lock No. 1, representing the maximum upstream movement on the river, 141,889 tons, shows a decline from the total of August, 1907, 166,878 tons, but is considerably above the 1906 total of 118,822 tons; the decline from the figures of August, 1907, is shown principally in building material. The upstream movement of bituminous coal for the eight months ending with August amounted to 5,314,980 tons, in comparison with 6,396,160 tons in 1907 and 5,854,112 tons in 1906. This represented the principal traffic during the eight months for this lock, the other commodities reported swelling the total for the current eight months to only 5,407,002 tons.

## VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PIG-IRON PRODUCTION.

[For tables pertaining to this section see page 361.]

Traffic of coal and coke over seven eastern coal-carrying roads during August, 1908, 9,734,886 tons, is below that of August, 1907, of 12,192,741 tons. Anthracite coal is reported by these seven roads during August at 375,747 tons, in comparison with 485,098 tons in August of last year. Bituminous coal, which shows the heaviest decline, is reported at 8,026,651 tons for the month of the current year, as against 9,404,526 tons reported for August of last year, while coke shows a decline of nearly a million bushels for the month when compared with the same month in 1907. During the season of eight months the coal reported by these seven roads amounted to 69,446,528 tons, contrasted with 93,017,918 tons for the same period in 1907; the greatest decline in the eight months is shown in the traffic of coke, which was, for the season of the current year, 9,589,641 tons, as against 18,563,244 tons. Anthracite coal makes a much better showing, being 3,838,873 tons for the eight months ending with August, 1908, compared with 4,788,165 tons for August, 1907. Bituminous coal, however, continues to show large decreases when compared with last year's heavy traffic.

Shipments of anthracite coal from eastern producing territory for the month, 4,599,093 gross tons, are in excess of last month's total, but below the August, 1907, shipments of 5,716,252 gross tons. For the first eight months of the year, 41,809,041 gross tons, show a decrease from the 44,203,282 gross tons reported for a like period in 1907, but indicate a marked gain over the 35,716,461 gross tons reported for the eight months of 1906.

The estimated coke production at Connellsville, including the so-called "Lower District," during the four weeks ending August 29, 783,304 net tons, are far short of a corresponding total for four weeks ending with August 29, 1907, though the 200,823 net tons reported for the week-end of August 29 is heavier than any week-end total since February 1 of the current year. With the above exception, and the week-end productions of January 25, the 200,823 net tons production is the largest of any week-end figures for the year.

The number of idle ovens continues to indicate a better showing; the 19,042 reported for the week ending August 29 shows fewer idle ovens than any week end reported since the early part of the current year.

Pig-iron production for the month, 1,348,831 gross tons, while showing an increase over the production for July, is considerably short of the production of August, 1907, when 2,250,410 gross tons were reported. The cumulative totals for the eight months continue to run about 47 per cent below the totals representing the production for a like period in 1907.

From wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields for the current month, runs of petroleum aggregated 8,108,773 barrels, and were nearly equal to the runs of July. To consumers 8,181,653 barrels were reported as regular deliveries for the month, in comparison with 8,481,529 barrels for last month. Gross stocks of reporting lines, 74,508,782 barrels, are, however, in excess of the preceding month of 72,539,363 barrels.

#### IX.—CHANGES IN OCEAN FREIGHT RATES.

[For tables pertaining to this section see page 365.]

Ocean freight rates on grain from New York and Boston to European ports remain about the same as those reported for last month, though when compared with August of last year the quoted rates show a general decline from one-fourth to one-half cent. The rate on tobacco from Baltimore to British ports while the same as those obtaining last month are, however, lower than August, 1907, quotations by about 2 cents on the hoghead. Quotations on compressed cotton both from Baltimore and New Orleans to European ports generally, continue with but few exceptions the same as those prevailing last month and vary but slightly from the August, 1907, rate.

#### COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-six different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given nevertheless as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

<sup>b</sup> Formerly Terminal (Minneapolis).

Reports from thirty-six car-service associations, covering practically the entire territory of the United States, indicate the total number of cars handled during August, 1908, 2,478,313, compared with 2,917,464 cars handled and 2,578,428 cars handled during August, 1907 and 1906, respectively. All the associations reporting (with the exception of three) show an increase in the number of cars reported for the current month over those reported for July.

#### I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for August and eight months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

#### WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for August and eight months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

## GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and

harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

## II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of August, and eight months ending with August. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of August transactions at 154 ports of receipt and 215 ports of shipment were reported. The number of vessels arriving in August was 10,497 and the clearances numbered 10,453 vessels. The registered tonnage for the month was as follows: Arrivals, 13,646,500 net tons; clearances, 13,543,975 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

## SUMMARY OF DOMESTIC LAKE TRAFFIC, AUGUST AND EIGHT MONTHS ENDING AUGUST, 1906-1908.

A summary of the lake traffic for August compared with the corresponding months in 1906 and 1907 is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. August receipts in 1908 at all ports reporting were 9,881,037 net tons, compared with 11,196,448 net tons in August, 1907, and 10,430,254 net tons in August, 1906. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

Shipments of boots and shoes from Boston, as reported by the Shoe and Leather Reporter, of Boston, Mass., for the four weeks ending August 29, 1908, amounted to 315,378 cases, against 388,211 cases in 1907. For the thirty-five weeks ending August 29, 1908, the shipments amounted to 2,279,974 cases, against 3,314,493 cases for the same period in 1907.

Fresh fish to the amount of 8,311,200 pounds were received at Boston during August, 1908, as compared with 9,594,475 pounds in August, 1907. At Gloucester the 1908 arrivals of fresh fish amounted to 6,117,054 pounds, and of salted fish 2,706,032 pounds. For August, 1907, corresponding totals were 6,546,506 pounds of fresh fish and 3,660,345 pounds of salted fish. The principal kinds received were cod, cusk, haddock, hake, pollock, halibut, and mackerel.

## GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour, reduced to bushels, at six seaboard markets, during August and eight months ending August, 1906, 1907, and 1908. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

a Revised figures for 1906 and 1907.

#### IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

#### COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During August vessels were supplied with fuel at these five ports to the amount of 298,904 tons.

During August 70 collectors of customs report 585,567 gross tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 144,684 tons were placed on board vessels destined to domestic ports and 440,883 tons on foreign-bound vessels\*. The total value of this tonnage was reported as being \$2,030,920, an average of about \$3.46 per ton.

Moreover, 34,990 gross tons of bunker coal were placed on lake vessels in the foreign trade during the month of August, 1908.

## V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton-trade reports include the statement of the quantity of the crop brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

## SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

## VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma, and the shipments of citrus fruit from southern California.

## VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

## VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the eight months ending August 31, 1908, of the vessels reported, 1,387 were loaded with coal; 500 carried lumber, logs, piling, and wood; 80 carried ties; 412 carried merchandise; 43, rocks; 14, corn; 34, manufactured iron; 6, molasses; 3, sugar; 10, brick; 1, staves; and 7, wire and nails.

The maximum tonnage on the Black Warrior River for August, 1908, was at Lock No. 11, where 2,641 tons of freight passed, of which 2,007 tons were stone, 165 tons were coal, and 469 tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for August, 1908, was at Lock No. 1, where 3,090 tons of freight passed, of which 2,500 were railroad ties and 590 miscellaneous.

Upstream tonnage on the Kentucky River during August, 1908, was largest at Lock No. 1, where 7,699 tons of freight passed, of which 5,800 tons were coal and 1,899 tons were miscellaneous merchandise. Downstream tonnage at Lock No. 5 aggregated 14,710 tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 22,409 tons.

Upstream tonnage on the Muskingum River during August, 1908, was largest at Lock No. 9, where 647 tons of freight passed, of which 36 tons were lumber and 611 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 1, where 1,301 tons of freight passed, mostly merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 1,948 tons.

#### TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 11,889 tons mined in the first and second pools during August, makes a total coal traffic of 487,769 tons for the river during August. Of other downstream freight, 7,362 tons of miscellaneous merchandise are to be added, making a total of 495,131 tons in August. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For eight months ending August the total movement was 6,606,278 tons in 1908, 8,164,879 tons in 1907, and 7,557,782 tons in 1906. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in August amounted to 141,889 tons.

The total freight moved in both directions on this basis of calculation was 637,020 tons in August, 1908, as against 1,180,456 tons in August, 1907, and 917,760 tons in August, 1906.

## VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

## STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

**X.—CHANGES IN RAILROAD FREIGHT RATES.**

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of August, 1908.

<sup>a</sup> Quarterly statement.

<sup>b</sup> Including bullion and specie, and articles for governments.

<sup>c</sup> Provisional figures, mainly on the basis of 1906 prices.

<sup>d</sup> Imports and exports by sea only.

<sup>e</sup> Average value of the haikwan tacl, 81.5 cents for 1906 and 79 cents for 1907.

<sup>f</sup> Indian imports include government stores. Exports include Indian merchandise only, and do not include government stores.

<sup>g</sup> Exports include Swedish lumber and wood pulp. The value of imports here given is the sum of 22 leading articles, which in 1907 constituted about 42 per cent of the total imports. The value of exports here given is the sum of 25 leading articles, which in 1907 constituted about 76 per cent of the total exports.

## EXPLANATIONS OF REGULAR STATISTICAL TABLES.

**General imports.**—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

**Domestic exports.**—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

**Foreign exports.**—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

**Warehoused merchandise.**—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

**Tonnage tables.**—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

**Weights.**—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

**Customs districts.**—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

# COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

# INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

## SEPTEMBER SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for September, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and nine months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

### I. COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section see page 517.]

Receipts of live stock at seven interior primary markets during September, 3,865,486 head, were in advance of like August as well as September, 1907, totals of 3,805,654 head, the gain over September, 1907, totals being due mainly to the heavier receipts of calves, hogs, and sheep. Receipts of cattle, horses, and mules for the month were below those reported for September, 1907. Kansas City, Omaha, St. Louis, and St. Joseph report larger receipts than a year ago; Chicago, St. Paul, and Sioux City show smaller figures. The smaller total for Chicago is due primarily to a shrinkage in the receipts of hogs, though arrivals of cattle and calves at that city likewise show smaller figures than a year ago. Combined live-stock receipts at the above seven markets for the nine months of the year ending September, 30,792,513 head, show a normal growth over 1906 and 1907 figures of 29,749,280 and 30,301,186 head, Kansas City and Omaha being the only two centers showing declines as compared with the 1907 season totals. The heaviest gain in season receipts is shown by St. Louis, this gain being due mainly to larger receipts of hogs. The number of cars used in handling this inbound movement, 534,707, because of the smaller number of cattle carried, was below the corresponding 1906 and 1907 totals of 544,881 and 572,146 cars.

Grain receipts at fifteen leading interior markets for September, 113,218,026 bushels, show large increases over the corresponding 1907 and 1906 receipts of 97,517,864 and 79,456,409 bushels. Increased receipts are reported, among others, from Minneapolis, Duluth, Milwaukee, and Omaha, while of the larger markets Chicago, St. Louis, and Kansas City show smaller receipts than for September of the preceding year. Of the total receipts, wheat constituted 49,781,226 bushels; corn 15,151,548 bushels; oats 27,944,201 bushels; barley 18,877,729 bushels. There were also reported 2,997,321 bushels of flaxseed, which do not enter into the above total. As compared with September, 1907, receipts, wheat shows the heaviest increase, about 88 per cent, mainly at Minneapolis and Duluth. The barley receipts show a 52 per cent increase, while the receipts of corn and oats were decidedly lower than during September, 1907. Combined grain receipts for the nine months of the year at these same markets, 550,054,758 bushels, mainly because of smaller corn receipts, were below like figures for the nine months in 1907 and 1906 of 609,463,693 and 551,132,465 bushels, the losses in season receipts being about equally distributed among all the larger markets.

Stocks of meat at five principal interior markets at the close of September, 157,129,461 pounds, were considerably below like figures for the preceding months as well as September, 1907 and 1906 figures; all the markets in question, particularly Chicago, show heavy declines in their stocks.

The east-bound trunk-line movement of provisions at Chicago and Chicago-Junction points during the five weeks ending September, 123,085 tons, was somewhat above the corresponding 1907 movement of 121,412 tons, though considerably below the corresponding 1906 total of 128,596 tons. The total for the forty weeks of the year, 847,564 tons, shows a considerable decrease as compared with the like 1906 and 1907 figures of 1,082,622 and 908,535 tons. The similar grain movement for the five-week period, 12,311,000 bushels, while lighter than the 1907 movement of 13,142,000 bushels, shows a considerable increase over the corresponding 1906 total of 8,258,000 bushels. The total for the forty weeks of the year, 111,302,000 bushels, indicates a large growth in east-bound grain shipments over the 1906 and 1907 figures of 87,721,000 and 98,433,000 bushels. Flour shipments during the five-week period, 498,759 barrels, were likewise below the corresponding 1907 figures of 526,414 barrels, though largely in excess of the 1906 total of 408,318 barrels. The total for the forty weeks, 4,443,120 barrels, while below the corresponding 1907 total, also shows a considerable growth over the corresponding 1906 total.

Shipments of packing-house products from Chicago during the month, 233,885,163 pounds, were 27 per cent in excess of like shipments during the preceding month, besides showing a normal growth over like 1906 and 1907 figures; as compared with September, 1907, total gains are shown in the shipments of fresh beef, cured meats and lard, while the heaviest decline is shown in the shipments of canned meat, corresponding to the decline in foreign shipments of this article. The shipments during the nine months of the year, 1,795,971,276 pounds, were below those for the two preceding years; all the larger items, with the exception of fresh beef, show smaller figures for the year than in 1907.

The gradual improvement in the lumber trade of the Central West is shown by the figures of monthly shipments of pine lumber from the Mississippi and Wisconsin valleys. The September shipments of 125,677,065 feet, while still below those for same month in 1906 and 1907, show, however, increased operations approximating the former high-water mark figures of 1907 before the depression set in.

### II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 525.]

Lake traffic between domestic ports during September as measured by the volume of shipments from various lake ports totaled 9,458,605 net tons, compared with 11,137,927 and 10,807,992 net tons shipped during September, 1907 and 1906. Shipments during the nine months of the year, 41,291,778 net tons, show an even larger relative decrease when compared with the corresponding 1907 and 1906

figures of 61,533,169 and 55,190,443 net tons. The decrease in the monthly total is due primarily to the smaller ore shipments, though coal and lumber likewise present a smaller monthly total than a year ago.

Grain shipments for the month were largely in excess of like shipments during September, 1907, and comprised 11,719,412 bushels of wheat, mainly from Duluth, Superior, Milwaukee, and Chicago, as against 7,185,162 bushels shipped in September, 1907; 3,388,045 bushels of corn, practically all from Chicago, as against 4,937,150 bushels shipped during September, 1907; 2,029,815 bushels of oats, mainly from Milwaukee, Duluth, Superior, Gladstone, and Manitowoc, compared with 824,674 bushels shipped during September, 1907; 3,457,048 bushels of barley, chiefly from Superior, Duluth, and Milwaukee, as against 922,003 bushels reported for September, 1907, and 236,943 bushels of rye, compared with 87,695 bushels shipped during September, 1907.

Domestic ore shipments for the month, proceeding at about the same rate as the month before, totaled 4,659,443 gross tons, compared with 6,005,227 gross tons reported for September, 1907, all the large shipping ports, except Escanaba and Ashland, showing smaller totals than a year ago. The total shipments since the beginning of the season, 16,595,317 gross tons, were about 45 per cent below the corresponding 1907 record. Shipments of soft coal, mainly from Lake Erie ports, 1,726,574 net tons, were slightly below the corresponding 1907 figures of 1,819,535 net tons, while the shipments of hard coal during the month, 335,282 net tons, show a large decrease as compared with 535,690 net tons shipped during September, 1907. These totals do not include the quantities of bunker coal supplied to lake steamers in the domestic trade, 227,541 net tons, compared with 263,363 net tons supplied during September, 1907. Moreover, 29,504 net tons were placed aboard vessels in the foreign trade during the same period. Lumber shipments during the month mainly to Chicago, North Tonawanda, Cleveland, and Milwaukee, totaled 139,336,000 feet, compared with 174,396,000 feet reported for September, 1907. The shipments of miscellaneous freight during the month, 807,520 net tons, were larger than the corresponding September, 1907, figures of 756,423 net tons. Increases over September, 1907, figures occurred also in the shipments of flour, salt, and copper.

Freight traffic through the canals at Sault Ste. Marie, Michigan, and Ontario, Canada, during September totaled 6,453,358 net tons, compared with 8,532,706 and 7,250,159 net tons reported for September, 1907 and 1906. The east-bound iron ore movement totaled 4,359,231 net tons, or about 2 million net tons less than a year ago, while the movement of wheat and other grain, 19,211,365 bushels, shows a 90 per cent gain over September, 1907, figures. The lumber movement shows a considerable decrease as compared with September, 1907, figures. The west-bound movement, particularly that of coal, was also lighter than a year ago. The freight movement for the season up to September 30, 26,725,262 net tons, shows a loss of 36 per cent and 28 per cent, as compared with corresponding 1907 and 1906 totals, while the number of vessels locked through the canals during the season and their registered tonnage, 10,567 vessels of 20,151,041 net tons, also show heavy losses as compared with the corresponding figures for the two preceding seasons.

### III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section see page 535.]

Aggregate September receipts of live stock at the four principal Atlantic seacoast cities, 786,143 head, compare favorably with the corresponding total for September, 1907, of 752,266 head, and were in excess of the preceding month's figures. Of the total receipts, 102,250 head were cattle; 320,832 hogs; 314,845 sheep, and 48,216 calves. The cattle figures are the only ones which show a decline as compared with the September, 1907, totals. Receipts for the nine months of the year, 7,161,765 head, show a 15 per cent gain over like 1907 figures; the increase occurring under the head of hogs and sheep.

Receipts of grain and flour during September at the same four cities, 16,283,010 bushels, were below like totals for September, 1906 and 1907, 18,449,508 and 19,710,351 bushels—all the cities in question showing losses as compared with last year's figures. Wheat receipts for the month, 5,363,430 bushels, were about 33 per cent below the September, 1907, receipts, the losses in the corn and flour receipts at these four cities being less notable. Aggregate grain and flour receipts at the four cities for the nine months of the year, 131,348,675 bushels, were over 50 million bushels short of the corresponding 1907 receipts; the main loss occurring under the head of corn though the wheat and flour figures also show declines as compared with the figures of a year ago, corresponding in the case of corn and flour to a smaller export movement. The loss in wheat receipts at the principal Atlantic seacoast cities for the nine months is accompanied by larger export movement, indicating either a shrinkage in the stocks held at these ports or else a decrease in consumption.

### IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 538.]

Coastwise receipts of southern pine at New York during September show the unusually small total of 16,379,959 feet, being a decline of over 60 per cent from September, 1907, figures. The receipts for the nine months of the year, 216,679,153 feet, likewise show a considerable shrinkage as compared with last year's figures, this decline being accounted for mainly by reason of smaller receipts from Charleston, S. C., Fernandina, Fla., Jacksonville, Fla., and Savannah, Ga.

Coastwise shipping arrivals at Boston during the month aggregated 687 vessels of 883,201 gross tons, compared with 802 vessels of 886,689 gross tons reported for September, 1907. Coastwise arrivals since the beginning of the year numbered 6,723 vessels of 7,718,154 gross tons, compared with 7,331 vessels of 7,678,826 gross tons for the corresponding period in 1907. Arrivals from southern and eastern ports show smaller figures than a year ago, though the tonnage reported from southern ports was in excess of the 1907 record.

The number of coastwise arrivals at the port of New York during September is given as 485, compared with 583 for September, 1907; the figures for the nine months of the year, 3,985, are likewise below the corresponding 1907 total of 4,811.

Arrivals of American vessels in the coastwise trade at Philadelphia for September, 356, show a similar decline from last year's figures of 421, though the figures for the nine months of the year, 3,169 arrivals, indicate but a slight decline in the coastwise vessel movement at that port.

### V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 541.]

Sight receipts of cotton during September, the first month of the new crop year, 1,218,689 bales, were largely in excess of like receipts during September, 1906 and 1907, of 994,528 and 841,329 bales. The total takings by domestic spinners, including overland takings by Canadian mills, for the month were 246,533 bales, compared with 280,762 and 276,434 bales during September, 1906 and 1907; the decreased total being due to smaller takings by southern mills, 147,439 bales, as compared with 191,466 and 197,423 bales credited to southern mills during September, 1906 and 1907. The receipts at United States ports during the month, 924,858 bales, were also largely in excess of like September, 1906 and 1907, figures of 719,842 and 582,025 bales, receipts at Galveston, 393,837 bales, being more than double those of a year

ago. The stocks in the country at the end of the month are stated as 693,945 bales, compared with 581,425 and 537,778 bales on September 30, 1906 and 1907.

According to the latest Census report, the quantity of cotton ginned to October 18 was 6,283,780 bales, compared with 4,420,258 bales and 4,931,621 bales during the corresponding periods in 1907 and 1906. All the cotton States, except Oklahoma, report larger figures than a year ago, the figures for Texas alone, 2,041,570 bales, being over 35 per cent in excess of corresponding 1907 figures.

Receipts of naval stores at Savannah, Ga., since April 1, were composed of 165,133 barrels of spirits of turpentine and 480,641 barrels of rosin, the corresponding 1907 figures being 128,929 barrels of spirits of turpentine and 367,833 barrels of rosin. The shipments during the year were composed of 151,042 barrels of spirits of turpentine and 416,025 barrels of rosin, the corresponding 1907 figures being 105,896 barrels of spirits of turpentine and 325,256 barrels of rosin. It is notable that the large increase in shipments is due primarily to increased exports, the gain in domestic shipments being inconsiderable.

#### VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 546.]

Grain and flour receipts at San Francisco during the month, 2,083,375 bushels, continue heavier than a year ago, the principal gains being shown in the receipts of wheat. The receipts for the nine months of the year, 11,503,165 bushels, are likewise in excess of the 1907 figures of 10,815,997 bushels, notwithstanding smaller season receipts of flour, barley, and oats, the gain being due exclusively to the considerably larger wheat receipts since the beginning of the year.

Wheat shipments from Portland, Oreg., during the month, 2,161,647 bushels, were over threefold the September, 1907, figures, both foreign and domestic shipments showing large gains over last year's figures. The flour shipments for the month, 69,704 barrels, show, on the other hand, a considerable decrease as compared with September, 1907, figures, due to smaller exports during the month. Wheat shipments from Portland for the nine months of the year, 12,239,446 bushels, compare favorably with corresponding 1907 figures of 4,990,572 bushels, the exports alone being in excess of 9½ million bushels since the beginning of the year, while flour shipments during the same period, 700,446 barrels, were considerably below the corresponding 1907 total of 1,261,163 barrels, the decrease in the total being due exclusively to smaller exports.

Lumber shipments from Portland, Oreg., during the month, 9,627,739 feet, while below like figures for the preceding months of the year were, however, on a larger scale than during September, 1907, when 9,022,061 feet were shipped. Over one-half of the monthly lumber shipments were destined to domestic points. The total for the nine months of the year, 133,594,659 feet, is but slightly below the corresponding 1907 total of 137,196,235 feet.

#### VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section see page 559.]

Figures of upstream traffic during the month on the Monongahela River at Lock No. 1, representing the maximum upstream movement on that river, 171,847 tons, are in excess of the like 1906 and 1907 figures, though the quantities of iron and steel products shipped were considerably below the totals for September of the two preceding years. The downstream traffic during the month at Lock No. 3, representing the maximum downstream movement on that river, 520,042 tons, are considerably below the figures for the preceding years, owing mainly to the smaller quantities of bituminous coal shipped that way. Both upstream and downstream traffic for the nine months of the year at the respective locks, 858,975 and 5,927,044 tons, show smaller totals than for the two preceding years.

River traffic in both directions by way of Davis Island Dam during the month, 182,384 tons, shows a larger total than during the two preceding years, though the increase is due merely to larger quantities of sand shipped by the river, the quantities of coal going downstream showing a considerable shrinkage when compared with the September, 1907, total. The figures for the nine months of the year, 2,623,512 tons, of which 1,727,659 tons are reported as coal, show a slight decline from the corresponding 1907 total of 2,629,656 tons. The vessel movement for the year, 21,658 vessels, was largely in excess of the corresponding 1907 total of 18,472 vessels.

Arrivals during the month by river at Cairo, Ill., at the confluence of the Mississippi and Ohio rivers, numbered 505 vessels of 278,251 tons, compared with 603 vessels of 332,583 tons reported during September, 1907. Of the total given, 296 vessels of 165,065 tons, represent a movement between points above and below Cairo, and 209 vessels of 113,186 tons a movement starting from or ending at Cairo. The movement for the nine months of the year included 6,355 vessels of 3,730,050 tons, compared with 6,519 vessels of 4,047,203 tons reported for the same period in 1907.

The freight movement over the New York state canals during the current season comprised 2,016,025 tons, of which 1,458,874 tons moved eastward and 557,151 tons westward. Less than one-fourth of the traffic was through freight, the rest being way or local freight. The traffic during the current season was the lightest since 1901.

#### VIII. COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PIG-IRON PRODUCTION.

[For tables pertaining to this section see page 553.]

Shipments of anthracite coal from eastern producing territory for the month, 5,211,047 gross tons, show a further increase over previous months' operations, though being below the September, 1907, shipments of 5,442,334 gross tons. The total shipments for the nine months of the year, 47,020,088 gross tons, were but 5 per cent below the corresponding 1907 shipments—the largest on record in the history of the anthracite coal trade.

September figures of coal and coke traffic over eight of the more important eastern coal-carrying railroads, 10,756,997 tons, indicate a gradual improvement in the coal trade, due mainly to larger shipments of bituminous coal and coke of 8,685,639 and 1,536,775 tons, compared with 9,914,734 and 2,529,459 tons, respectively, carried by the same roads during September, 1907. The figures for the nine months of the year, 81,004,049 tons, are about 24 per cent below the corresponding 1907 total, and were composed of 4,373,456 tons of anthracite, 65,388,579 tons of bituminous coal, and 11,242,014 tons of coke.

The estimated weekly coke production at Connellsville, including the Lower District, during the five weeks ending October 3 was 197,397 net tons, compared with a weekly average of 427,066 net tons obtaining for the same period in 1907. This relatively low average marks, however, an improvement over the weekly average for the forty weeks of the year of 172,977 net tons. The estimated production for the forty weeks of the year, 6,919,064 net tons, was about 58 per cent below the corresponding 1907 total. The number of cars used in shipping this product to places of consumption, 263,278, shows a relative decrease, as compared with 1907 figures, almost as large as the figures of production.

Pig-iron production for the thirty days of the month, 1,418,998 gross tons, shows the largest monthly production for the year, though falling about 35 per cent short of the September, 1907, figures. The production figures for the nine months of the year, 10,755,573 gross tons, were about 46 per cent below corresponding 1907 figures.

Runs of petroleum from wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields during September aggregated 7,801,395 barrels. Regular deliveries to consumers are stated as 8,287,385 barrels, a quantity somewhat larger than the one reported for August. Gross stocks of the reporting lines at the end of the month are given as 75,707,053 barrels, compared with 49,669,166 barrels reported for the end of September a year ago.

#### COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-five different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given nevertheless as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

Reports from 35 car-service associations and demurrage bureaus, covering practically the entire territory of the United States, indicate a further improvement in the car situation, the total for September, 2,734,826 cars handled, being over one-quarter of a million cars larger than for the preceding month, though still over 134,000 cars short of the September, 1907, record. The number of surplus cars reported by the American Railway Association, under date of October 14, was 115,036, showing a substantial improvement since the 16th and 30th of September, for which dates 173,587 and 133,792 idle cars were reported. The most notable improvement occurs under the head of box and coal cars. For the first time during the year considerable shortages of cars are reported, though chiefly on Canadian lines.

#### I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for September and nine months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

##### WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for September and nine months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

## II. DOMESTIC COMMERCE OF THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of September and nine months ending with September. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of September transactions at 150 ports of receipt and 210 ports of shipment were reported. The number of vessels arriving in September was 8,827 and the clearances numbered 8,908 vessels. The registered tonnage for the month was as follows: Arrivals, 11,743,517 net tons; clearances, 11,991,859 tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

## SUMMARY OF DOMESTIC LAKE TRAFFIC SEPTEMBER AND NINE MONTHS ENDING SEPTEMBER, 1906-1908.

A summary of the lake traffic for September compared with the corresponding months in 1906 and 1907 is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. September receipts in 1908 at all ports reporting were 8,950,733 net tons, compared with 11,114,119 net tons in September, 1907, and 10,081,880 net tons in September, 1906. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

Shipments of boots and shoes from Boston, as reported by the Shoe and Leather Reporter, of Boston, Mass., for the five weeks ending October 3, 1908, amounted to 412,809 cases, against 448,813 cases in 1907. For the forty weeks ending October 3, 1908, the shipments amounted to 2,692,783 cases, against 3,763,306 cases for the same period in 1907.

Fresh fish to the amount of 12,226,020 pounds were received at Boston during September, 1908, as compared with 8,549,540 pounds in September, 1907. At Gloucester the 1908 arrivals of fresh fish amounted to 7,598,886 pounds, and of salted fish 3,730,786 pounds. For September, 1907, corresponding totals were 6,517,126 pounds of fresh fish and 3,958,897 pounds of salted fish. The principal kinds received were cod, cusk, haddock, hake, pollock, halibut, and mackerel.

## GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour, reduced to bushels, at six seaboard markets, during September and nine months ending September, 1906, 1907, and 1908. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

a Revised figures for 1906 and 1907.

## IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

## COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During September vessels were supplied with fuel at these five ports to the amount of 305,071 tons, and for nine months ending with September, 2,723,071 tons.

## V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton reports include the statements of the quantity of the crop ginned, brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

## SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills, and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

## VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma, and the shipments of citrus fruit from southern California.

## VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

## VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the nine months ending September 30, 1908, of the vessels reported, 1,394 were loaded with coal; 591 carried lumber, logs, piling, and wood; 91 carried ties; 489 carried merchandise; 45, rocks; 14, corn; 34, manufactured iron; 6, molasses; 3, sugar; 10, brick; 1, staves; and 7, wire and nails.

The maximum tonnage on the Cumberland River for September, 1908, was at Lock No. 1, where 2,043 tons of freight passed, of which 2,025 were sand and gravel and 18 miscellaneous.

Upstream tonnage on the Kentucky River during September, 1908, was largest at Lock No. 11, where 4,214 tons of freight passed, all of which was miscellaneous merchandise. Downstream tonnage at Lock No. 5 aggregated 3,990 tons of miscellaneous freight. The grand total freight passing in both directions at locks of maximum tonnage was 8,204 tons.

Upstream tonnage on the Muskingum River during September, 1908, was largest at Lock No. 2, where 859 tons of freight passed, of which 25 tons were coal, 252 tons were lumber, and 582 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 1, where 3,932 tons of freight passed, mostly merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 4,791 tons.

#### TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 23,431 tons mined in the first and second pools during September, makes a total coal traffic of 533,151 tons for the river during September. Of other downstream freight, 10,322 tons of miscellaneous merchandise are to be added, making a total of 543,473 tons in September. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For nine months ending September the total movement was 7,321,598 tons in 1908, 9,207,789 tons in 1907, and 8,437,680 tons in 1906. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in September amounted to 171,847 tons.

The total freight moved in both directions on this basis of calculation was 715,320 tons in September, 1908, as against 1,042,910 tons in September, 1907, and 879,898 tons in September, 1906.

#### VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connells-ville coke output and shipments, St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

## STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have received to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

## X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of September, 1908.

*a* Quarterly statement.

*b* Including bullion and specie, and articles for governments.

*c* Provisional figures, mainly on the basis of 1906 prices.

*d* Imports and exports by sea only.

*e* Average value of the baïkwan taol, 81.5 cents for 1906 and 79 cents for 1907.

*f* Indian imports include government stores. Exports include Indian merchandise only, and do not include government stores.

*g* Exports include Swedish lumber and wood pulp. The value of imports here given is the sum of 22 leading articles, which in 1907 constituted about 42 per cent of the total imports. The value of exports here given is the sum of 25 leading articles, which in 1907 constituted about 76 per cent of the total exports.

*h* By courtesy of the Bureau of Insular Affairs, War Department.

*i* European frontier and the Caucasian Black Sea frontier.

*j* The data of the Spanish trade, stated in the original reports in silver pesetas, have been converted at the rate of \$0.193, which is the value of the gold peseta. No account has been taken of the premium on gold in Spain, because sufficient data were lacking.

*k* Domestic exports.
